

## **Chief Medical Officer (Fractional)**

**Position Title:** Chief Medical Officer

**Department:** Clinical Affairs

**Reports To:** Chief Scientific Officer

**Location:** San Diego

**Status:** Full-Time

### **About CureScience Institute**

CureScience Institute is a translational research and precision medicine organization focused on advancing personalized approaches for cancer, neurological disorders, immunotherapy, and complex disease. Through research, bioinformatics, clinical collaborations, and patient-centered education, CureScience works to help accelerate access to innovative treatment insights and scientific advancement.

### **Position Summary**

CureScience Institute seeks a physician leader to serve as Fractional Chief Medical Officer (CMO). The CMO will provide medical leadership and strategic guidance to support the organization's growing portfolio of translational research initiatives, clinical collaborations, precision medicine programs, and physician engagement activities.

The CMO will work closely with executive leadership, scientific staff, advisors, and external collaborators to ensure CureScience's programs maintain scientific rigor, clinical relevance, and alignment with emerging advances in precision medicine.

This role is designed as a part-time executive leadership position and is ideal for a physician with experience in oncology, neurology, immunotherapy, precision medicine, or translational research.

### **Key Responsibilities**

#### **Medical Leadership**

- Provide physician leadership across CureScience programs and initiatives.
- Advise on medical and clinical aspects of research projects.
- Participate in scientific and strategic planning activities.

## **Clinical Strategy**

- Assist in the development of physician-facing initiatives and partnerships.
- Support expansion of precision medicine and translational research programs.
- Advise on opportunities for clinical collaboration and future study development.

## **Scientific Review**

- Review scientific reports, educational materials, and clinical content.
- Ensure appropriate clinical context and interpretation of research findings.
- Support quality and consistency of physician communications.

## **External Engagement**

- Represent CureScience with physicians, researchers, healthcare organizations, and industry partners.
- Participate in conferences, scientific meetings, and collaborative initiatives.
- Support cultivation of strategic partnerships.

## **Organizational Leadership**

- Collaborate with the Executive Director, Chief Scientific Officer, and Scientific Advisory Board.
- Contribute to long-term organizational strategy and growth planning.
- Assist with grant development, scientific publications, and thought leadership initiatives.

## **Qualifications**

### **Required**

- MD or DO degree.
- Board certification in a relevant specialty.
- Experience in oncology, neurology, immunology, precision medicine, or related disciplines.
- Strong communication and leadership skills.

### **Preferred**

- Experience in translational research or academic medicine.
- Participation in clinical trials or investigator-initiated studies.
- Experience working with nonprofit organizations, biotechnology companies, or research institutes.

- Existing relationships within relevant scientific and medical communities.

### **Work Environment**

- Remote or hybrid.
- Part-time executive leadership role.
- Flexible schedule.
- Estimated commitment of 5–15 hours per week.

### **Compensation**

Compensation is competitive and commensurate with experience. This role may be structured as a consulting engagement, stipend-based appointment, or fractional executive position.

### **To Apply**

Interested candidates should submit a curriculum vitae and a statement of interest outlining their experience and alignment with CureScience's mission.
